SUPPLEMENT

ATTACHMENT 1 Table

25X1X

1. The attached table gives official figures for the acreage, average production per hectare, and total production of crops for 1938, 1944, and 1946 in the area now included in the Russian Zone.
2. The figures for average production per hectare in 1946 are taken from the third crop estimate, which was made in September 1946.

25X1A

Comment: Because of the discrepancies which result when the acreage figures are multiplied by the average production figures, it is believed that the average production figures for 1938 and 1944, like those for 1946, are estimates made before the total crop production figures were known. Because of the great discrepancy which occurs when the 1946 raw fodder acreage figure is multiplied by the average production figure, it is obvious that one of these figures is incorrectly given. This is probably due to a copying error on [REDACTED]
